Neurosurgical Emergencies

Virtual Course

CNS

Join us for this three-day course on state-of-the-art diagnosis, workup, and first-line treatments for neurosurgical emergencies. This fast-paced course focuses on emerging technologies that are changing the field, including advances in stroke management, the emerging role of TXA in intra-cerebral hemorrhage, the ever-changing landscape of anticoagulation, and more! Enhance your learning through small-group breakout discussions and case-based learning.

View the agenda and register at cns.org/trauma.
